Table of contents

Getting started

Every code, option and tutorial of html.framework-y.com can be used into your project.

The best method for create a website with this template is by maintain always open this website on your browser and use it for everything.

Page layout and structure

The structure (layout) of the page is always the same: header, sections and footer. Every page of your website will contain only the header, a lists of sections and the footer.

Sections

The sections are the core container of everything and usually contains only columns, you can access the sections from the Containers menu voice.

Columns

The columns are based on the Bootstrap grid system. You have 12 columns widths where col-12 is the larger full-width column and col-1 is the smaller. Columns are responsive, you can set different widths on mobile with special classes, click the below button for more details.

.col-md-1	.col-md-1	.col-md-1	.col-md-1	.col-md-1	.col-md-1	.col-md-1	.col-md-1	.col-md-1	.col-md-1	.col-md-1	.col-md-1
.col-md-7							.col-md-5				
.col-md-10										.col-md-2	
.col-md-11											.col-...
.col-md-8								.col-md-4			
.col-md-4				.col-md-4				.col-md-4			
.col-md-6						.col-md-6					
.col-md-3			.col-md-3			.col-md-3			.col-md-3		
.col-md-2		.col-md-2		.col-md-2		.col-md-2		.col-md-2		.col-md-2	

Components and containers

The components and the containers are the true contents and should be inserted only into the columns.

Structure example

All your pages should have the same structure of the code below:

```html
<html>
    <head>
        ...
    </head>
    <body>
        <div id="preloader"></div>
        <header>

            <!-- MENU HERE -->
        </header>
        <div class="section-empty section-item">
            <div class="container content">

                <!-- COLUMNS HERE -->
            </div>
        </div>
        <div class="section-empty section-item">
            <div class="container content">
                <div class="row">
                    <div class="col-md-4">

                        <!-- COMPONENTS OR CONTAINERS HERE -->
                    </div>
                    <div class="col-md-4">

                        <!-- COMPONENTS OR CONTAINERS HERE -->
                    </div>
                    <div class="col-md-4">

                        <!-- COMPONENTS OR CONTAINERS HERE -->
                    </div>
                </div>
            </div>
        </div>

        <!-- NEW SECTIONS HERE -->
        <footer>

            <!-- FOOTER CONTENT HERE -->
        </footer>
    </body>
</html>
```

Design

1. Include file skin.css into the template root folder into header object of every page as last item. The file skin.css must be the last css file included.
2. Replace the template's colors by edit the first block of the skin.css code: COLORS.

Layout, Bootstrap and columns

Before starting you should also understand the basic features of the framework and of Bootstrap, this will save you much time in future.

Go to http://getbootstrap.com/

Headers

The template provide up to 10 header types including inner menu and side menus. The documentation of all headers can be found at http://html.framework-y.com/. The headers are grouped into three categories.

1. Classic menus
2. Side menus
3. Inner menus

Components

The documentation of all components can be found at http://html.framework-y.com/

Components

1. CSS and Javascript
2. Buttons
3. Popovers
4. Bootstrap components
5. Image boxes
6. Content boxes
7. Social media
8. Google maps
9. Subtitles
10. Icons
11. Lists
12. Counters
13. Countdowns
14. Progress bars
15. Circle progress bars
16. Timeline
17. Tables
18. Contact form

Titles

1. Image background

2. Video background MP4
3. Slider background
4. Animation background
5. Base

Containers

The documentation of all components can be found at http://html.framework-y.com/

Containers

1. Grid
2. Masonry
3. Lightbox and popups
4. Sliders and carousels
5. Scroll box
6. Tabs
7. Steps
8. Collapse box
9. Accordions

Sections

1. Empty section
2. Background image
3. Two blocks
4. Slider
5. Google Maps
6. Background video
7. Background animations

Templates

1. Fullpage
2. Two sides
3. Background image
4. Background slider
5. Background video
