Sound effects: <https://www.noiseforfun.com>

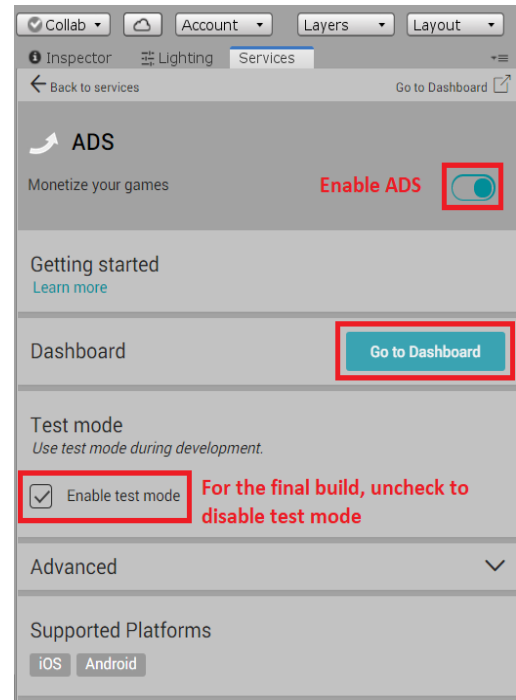

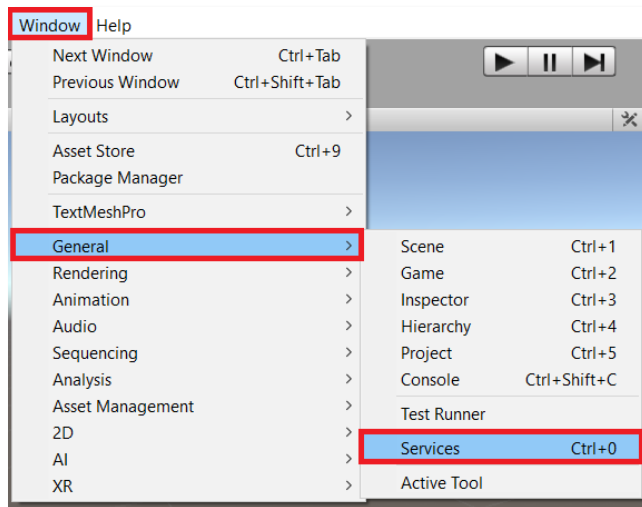

IMPORTANT

1. In this asset I use **TextMesh Pro** for the text elements. First you have to import it.

IMPLEMENTING ADS

1. Open *Services*

2. Enable Ads. If you want to test the ads, then enable test mode, but **you will need to disable test mode for the final build.**

3. Close and reopen project!!!

4. Find AdManager in the Hierarchy.

You will need to disable test mode for the final build. You can select the AD network here.

You have to change App ID, and AD IDs for the final build.

Enable this for testing, disable it for final build
Using Unity Ads when enabled, using Admob when disabled

Use the ad IDs you created in your Admob Panel

- Find RewardButton in the Hierarchy. You can change the amount of tokens the player gets after watching a Reward Video Ad.

Player gets this many tokens after watching a Reward Video Ad ➡

5. Resolve just before building the project.

Calling ADS

Admob

```
FindObjectOfType<AdManager>().ShowAdmobBanner();  
FindObjectOfType<AdManager>().ShowAdmobInterstitial();  
FindObjectOfType<AdManager>().ShowAdmobRewardVideo();
```

Unity ADS

```
FindObjectOfType<AdManager>().ShowUnityVideoAd();  
FindObjectOfType<AdManager>().ShowUnityRewardVideoAd();
```

If you want to use Unity Ads, then after you have done the 1, 2, 3 steps, you have to **uncomment** some lines in the following scripts:

GameManager.cs **Uncomment lines: 21-23, 32-37**

```
19 void Start () {
20     //UNCOMMENT THE FOLLOWING LINES IF YOU ENABLED UNITY ADS AT UNITY SERVICES AND REOPENED THE PROJECT!
21     //if (FindObjectOfType<AdManager>().unityAds)
22     //    CallUnityAds(); //Calls Unity Ads
23     //else
24     //    CallAdmobAds(); //Calls Admob Ads
25
26     StartPanelActivation();
27     HighScoreCheck();
28     AudioCheck();
29 }
30
31 //UNCOMMENT THE FOLLOWING LINES IF YOU ENABLED UNITY ADS AT UNITY SERVICES AND REOPENED THE PROJECT!
32 //public void CallUnityAds()
33 //{
34 //    if (Time.time != Time.timeSinceLevelLoad)
35 //        FindObjectOfType<AdManager>().ShowUnityVideoAd(); //Shows Interstitial Ad when game starts (except for the first time)
36 //    FindObjectOfType<AdManager>().HideAdmobBanner();
37 //}
38
```

RewardButton.cs **Uncomment lines: 23-25**

```
20 public void ShowRewardVideo()
21 {
22     //UNCOMMENT THE FOLLOWING LINES IF YOU ENABLED UNITY ADS AT UNITY SERVICES AND REOPENED THE PROJECT!
23     //if (FindObjectOfType<AdManager>().unityAds)
24     //    FindObjectOfType<AdManager>().ShowUnityRewardVideoAd(); //Shows Unity Reward Video ad
25     //else
26     //    FindObjectOfType<AdManager>().ShowAdmobRewardVideo(); //Shows Admob Reward Video ad

```

AdManager.cs **Uncomment lines: 253-259, 262-288**

```
251 /*
252 //Call this to show video ad
253 public void ShowUnityVideoAd()
254 {
255     Debug.Log("ShowUnityVideoAd");
256
257     if (Advertisement.IsReady("video"))
258         Advertisement.Show("video");
259 }
260
261 //Call this to show reward video ad
262 public void ShowUnityRewardVideoAd()
263 {
264     Debug.Log("ShowUnityRewardVideoAd");
265     if (Advertisement.IsReady("rewardedVideo"))
266     {
267         Debug.Log("Showing Advertisement");
268         var options = new ShowOptions { resultCallback = HandleShowResult };
269         Advertisement.Show("rewardedVideo", options);
270     }
271 }
272
273 private void HandleShowResult(ShowResult result)
274 {
275     switch (result)
276     {
277         case ShowResult.Finished:
278             Debug.Log("The Unity Reward ad was shown successfully");
279             FindObjectOfType<RewardButton>().AddReward(); //Adds reward to the player when rewardVideo is finished successfully
280             break;
281         case ShowResult.Skipped:
282             Debug.Log("Ad was skipped");
283             break;
284         case ShowResult.Failed:
285             Debug.LogError("The ad failed to be shown");
286             break;
287     }
288 }
289 */

```

ABOUT THE GAME

How to play

On mobile : Move your finger on the screen to move with the player.

On desktop/web : Use 'A' and 'D' keys to make the player move.

Goal

Your goal is to hit the obstacle which has the same shape as yours.

However, if you hit a obstacle which has different shape, then you die.

FOLDER STRUCTURE

- **Assets**

Contains all of the used assets for the game

- ***Animations***

Contains all of the used animations

- ***Audio***

Contains all of the used sound effects and background music

- ***Materials***

Contains every used materials

- ***Meshes***

Contains every used meshes

- ***Particles***

Contains the used ParticleSystems

- ***Prefabs***

Contains the used prefabs (for example obstacles)

- ***Scripts***

Contains C# scripts

- ***Sprites***

Contains all of the used 2D sprites (for example UI elements)

- **Documentation**

Contains documentation

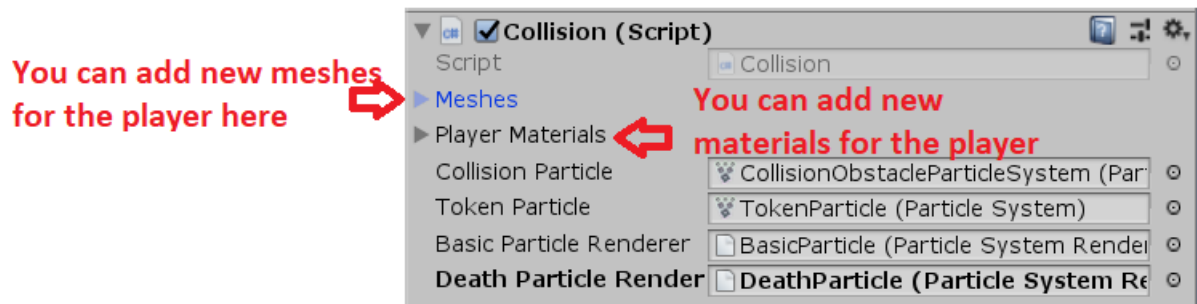

- **Scenes**

Contains complete level(s) and lightmap of the level(s)

CUSTOMIZATION

Player:

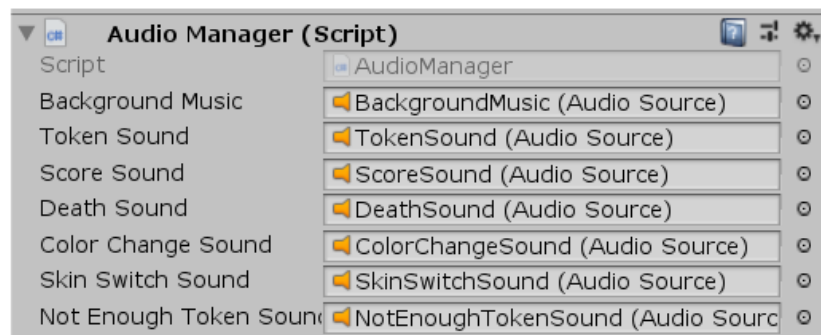

Skin1:

AudioManager:

You can change sound effects here, and under the gameobject's children

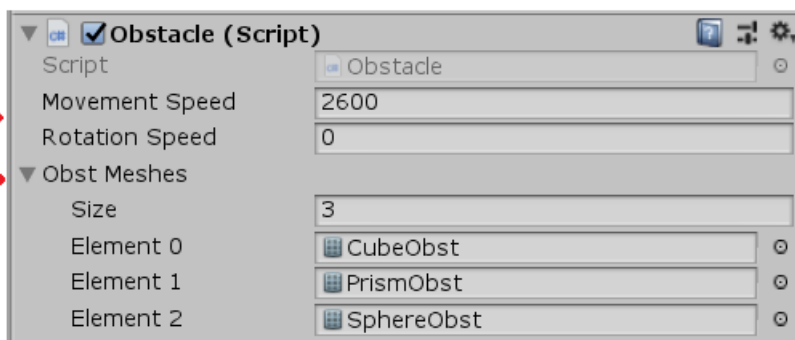

Obstacles:

Movement and rotation speed of obstacle

You can add new meshes to the obstacles here

Spawner:

You can add new obstacles to be spawned →

The next spawn will start sooner by this value →

The lower this value is - the token spawns more frequently →

Next spawn will start after x seconds ←

If timeBetweenSpawns reach this limit, it won't decrease anymore ←

Property	Value
Script	Spawner
Obstacles	
Token	Token
Time Between Spawns	2.2
Time Reduce	0.06
Min Time Between Spawns	0.8
Token Spawn Frequency	7

Tunnel:

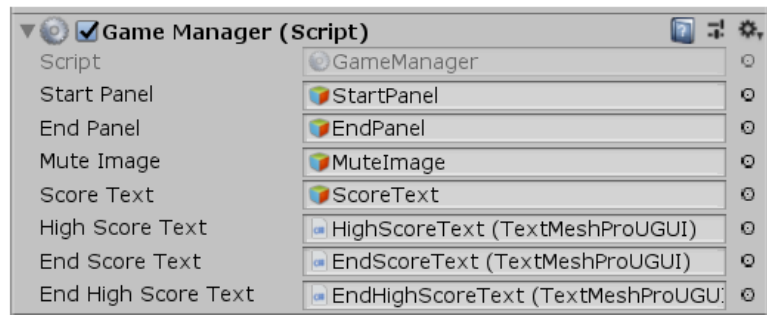

You can change the speed of the pipes/tunnel →

Property	Value
Script	PipeMove
Movement Speed	2600

GameManager:

GameManager script contains the main functions of the game. It manages scenes (starts, restarts the level), enables/disables scripts and gameObjects, switches between panels

ObjectDestroyer:

ObjectDestroyer script is responsible for destroying every object that collides with it

Best regards, Ragendom
